Heard: June 25 and 26, 2008

On appeal from the sanction order of Justice Colin L. Campbell of the Superior Court of Justice, dated June 5, 2008, with reasons reported at [2008] O.J. No. 2265.

BLAIR J.A.:

A. INTRODUCTION

[1] In August 2007 a liquidity crisis suddenly threatened the Canadian market in Asset Backed Commercial Paper (“ABCP”). The crisis was triggered by a loss of confidence amongst investors stemming from the news of widespread defaults on U.S. sub-prime

mortgages. The loss of confidence placed the Canadian financial market at risk generally and was reflective of an economic volatility worldwide.

[2] By agreement amongst the major Canadian participants, the \$32 billion Canadian market in third-party ABCP was frozen on August 13, 2007 pending an attempt to resolve the crisis through a restructuring of that market. The Pan-Canadian Investors Committee, chaired by Purdy Crawford, C.C., Q.C., was formed and ultimately put forward the creditor-initiated Plan of Compromise and Arrangement that forms the subject-matter of these proceedings. The Plan was sanctioned by Colin L. Campbell J. on June 5, 2008.

[3] Certain creditors who opposed the Plan seek leave to appeal and, if leave is granted, appeal from that decision. They raise an important point regarding the permissible scope of a restructuring under the *Companies' Creditors Arrangement Act*, R.S.C. 1985, c. C-36 as amended ("CCAA"): can the court sanction a Plan that calls for creditors to provide releases to third parties who are themselves solvent and not creditors of the debtor company? They also argue that, if the answer to this question is yes, the application judge erred in holding that this Plan, with its particular releases (which bar some claims even in fraud), was fair and reasonable and therefore in sanctioning it under the CCAA.

Leave to Appeal

[4] Because of the particular circumstances and urgency of these proceedings, the court agreed to collapse an oral hearing for leave to appeal with the hearing of the appeal itself. At the outset of argument we encouraged counsel to combine their submissions on both matters.

[5] The proposed appeal raises issues of considerable importance to restructuring proceedings under the CCAA Canada-wide. There are serious and arguable grounds of appeal and – given the expedited time-table – the appeal will not unduly delay the progress of the proceedings. I am satisfied that the criteria for granting leave to appeal in CCAA proceedings, set out in such cases as *Re Cineplex Odeon Corp.* (2001), 24 C.B.R. (4th) 201 (Ont. C.A.), and *Re Country Style Food Services* (2002), 158 O.A.C. 30, are met. I would grant leave to appeal.

Appeal

[6] For the reasons that follow, however, I would dismiss the appeal.

B. FACTS

The Parties

[7] The appellants are holders of ABCP Notes who oppose the Plan. They do so principally on the basis that it requires them to grant releases to third party financial institutions against whom they say they have claims for relief arising out of their purchase of ABCP Notes. Amongst them are an airline, a tour operator, a mining

company, a wireless provider, a pharmaceuticals retailer, and several holding companies and energy companies.

[8] Each of the appellants has large sums invested in ABCP – in some cases, hundreds of millions of dollars. Nonetheless, the collective holdings of the appellants – slightly over \$1 billion – represent only a small fraction of the more than \$32 billion of ABCP involved in the restructuring.

[9] The lead respondent is the Pan-Canadian Investors Committee which was responsible for the creation and negotiation of the Plan on behalf of the creditors. Other respondents include various major international financial institutions, the five largest Canadian banks, several trust companies, and some smaller holders of ABCP product. They participated in the market in a number of different ways.

The ABCP Market

[10] Asset Backed Commercial Paper is a sophisticated and hitherto well-accepted financial instrument. It is primarily a form of short-term investment – usually 30 to 90 days – typically with a low interest yield only slightly better than that available through other short-term paper from a government or bank. It is said to be “asset backed” because the cash that is used to purchase an ABCP Note is converted into a portfolio of financial assets or other asset interests that in turn provide security for the repayment of the notes.

[11] ABCP was often presented by those selling it as a safe investment, somewhat like a guaranteed investment certificate.

[12] The Canadian market for ABCP is significant and administratively complex. As of August 2007, investors had placed over \$116 billion in Canadian ABCP. Investors range from individual pensioners to large institutional bodies. On the selling and distribution end, numerous players are involved, including chartered banks, investment houses and other financial institutions. Some of these players participated in multiple ways. The Plan in this proceeding relates to approximately \$32 billion of non-bank sponsored ABCP the restructuring of which is considered essential to the preservation of the Canadian ABCP market.

[13] As I understand it, prior to August 2007 when it was frozen, the ABCP market worked as follows.

[14] Various corporations (the "Sponsors") would arrange for entities they control ("Conduits") to make ABCP Notes available to be sold to investors through "Dealers" (banks and other investment dealers). Typically, ABCP was issued by series and sometimes by classes within a series.

[15] The cash from the purchase of the ABCP Notes was used to purchase assets which were held by trustees of the Conduits ("Issuer Trustees") and which stood as security for repayment of the notes. Financial institutions that sold or provided the Conduits with the

assets that secured the ABCP are known as “Asset Providers”. To help ensure that investors would be able to redeem their notes, “Liquidity Providers” agreed to provide funds that could be drawn upon to meet the demands of maturing ABCP Notes in certain circumstances. Most Asset Providers were also Liquidity Providers. Many of these banks and financial institutions were also holders of ABCP Notes (“Noteholders”). The Asset and Liquidity Providers held first charges on the assets.

[16] When the market was working well, cash from the purchase of new ABCP Notes was also used to pay off maturing ABCP Notes; alternatively, Noteholders simply rolled their maturing notes over into new ones. As I will explain, however, there was a potential underlying predicament with this scheme.

The Liquidity Crisis

[17] The types of assets and asset interests acquired to “back” the ABCP Notes are varied and complex. They were generally long-term assets such as residential mortgages, credit card receivables, auto loans, cash collateralized debt obligations and derivative investments such as credit default swaps. Their particular characteristics do not matter for the purpose of this appeal, but they shared a common feature that proved to be the Achilles heel of the ABCP market: because of their long-term nature there was an inherent timing mismatch between the cash they generated and the cash needed to repay maturing ABCP Notes.

[18] When uncertainty began to spread through the ABCP marketplace in the summer of 2007, investors stopped buying the ABCP product and existing Noteholders ceased to roll over their maturing notes. There was no cash to redeem those notes. Although calls were made on the Liquidity Providers for payment, most of the Liquidity Providers declined to fund the redemption of the notes, arguing that the conditions for liquidity funding had not been met in the circumstances. Hence the “liquidity crisis” in the ABCP market.

[19] The crisis was fuelled largely by a lack of transparency in the ABCP scheme. Investors could not tell what assets were backing their notes – partly because the ABCP Notes were often sold before or at the same time as the assets backing them were acquired; partly because of the sheer complexity of certain of the underlying assets; and partly because of assertions of confidentiality by those involved with the assets. As fears arising from the spreading U.S. sub-prime mortgage crisis mushroomed, investors became increasingly concerned that their ABCP Notes may be supported by those crumbling assets. For the reasons outlined above, however, they were unable to redeem their maturing ABCP Notes.

The Montreal Protocol

[20] The liquidity crisis could have triggered a wholesale liquidation of the assets, at depressed prices. But it did not. During the week of August 13, 2007, the ABCP market in Canada froze – the result of a standstill arrangement orchestrated on the heels of the

crisis by numerous market participants, including Asset Providers, Liquidity Providers, Noteholders and other financial industry representatives. Under the standstill agreement – known as the Montréal Protocol – the parties committed to restructuring the ABCP market with a view, as much as possible, to preserving the value of the assets and of the notes.

[21] The work of implementing the restructuring fell to the Pan-Canadian Investors Committee, an applicant in the proceeding and respondent in the appeal. The Committee is composed of 17 financial and investment institutions, including chartered banks, credit unions, a pension board, a Crown corporation, and a university board of governors. All 17 members are themselves Noteholders; three of them also participated in the ABCP market in other capacities as well. Between them, they hold about two thirds of the \$32 billion of ABCP sought to be restructured in these proceedings.

[22] Mr. Crawford was named the Committee's chair. He thus had a unique vantage point on the work of the Committee and the restructuring process as a whole. His lengthy affidavit strongly informed the application judge's understanding of the factual context, and our own. He was not cross-examined and his evidence is unchallenged.

[23] Beginning in September 2007, the Committee worked to craft a plan that would preserve the value of the notes and assets, satisfy the various stakeholders to the extent possible, and restore confidence in an important segment of the Canadian financial

marketplace. In March 2008, it and the other applicants sought CCAA protection for the ABCP debtors and the approval of a Plan that had been pre-negotiated with some, but not all, of those affected by the misfortunes in the Canadian ABCP market.

The Plan

a) Plan Overview

[24] Although the ABCP market involves many different players and kinds of assets, each with their own challenges, the committee opted for a single plan. In Mr. Crawford's words, "all of the ABCP suffers from common problems that are best addressed by a common solution." The Plan the Committee developed is highly complex and involves many parties. In its essence, the Plan would convert the Noteholders' paper – which has been frozen and therefore effectively worthless for many months – into new, long-term notes that would trade freely, but with a discounted face value. The hope is that a strong secondary market for the notes will emerge in the long run.

[25] The Plan aims to improve transparency by providing investors with detailed information about the assets supporting their ABCP Notes. It also addresses the timing mismatch between the notes and the assets by adjusting the maturity provisions and interest rates on the new notes. Further, the Plan adjusts some of the underlying credit default swap contracts by increasing the thresholds for default triggering events; in this way, the likelihood of a forced liquidation flowing from the credit default swap holder's prior security is reduced and, in turn, the risk for ABCP investors is decreased.

[26] Under the Plan, the vast majority of the assets underlying ABCP would be pooled into two master asset vehicles (MAV1 and MAV2). The pooling is designed to increase the collateral available and thus make the notes more secure.

[27] The Plan does not apply to investors holding less than \$1 million of notes. However, certain Dealers have agreed to buy the ABCP of those of their customers holding less than the \$1-million threshold, and to extend financial assistance to these customers. Principal among these Dealers are National Bank and Canaccord, two of the respondent financial institutions the appellants most object to releasing. The application judge found that these developments appeared to be designed to secure votes in favour of the Plan by various Noteholders, and were apparently successful in doing so. If the Plan is approved, they also provide considerable relief to the many small investors who find themselves unwittingly caught in the ABDP collapse.

b) The Releases

[28] This appeal focuses on one specific aspect of the Plan: the comprehensive series of releases of third parties provided for in Article 10.

[29] The Plan calls for the release of Canadian banks, Dealers, Noteholders, Asset Providers, Issuer Trustees, Liquidity Providers, and other market participants – in Mr. Crawford’s words, “virtually all participants in the Canadian ABCP market” – from any liability associated with ABCP, with the exception of certain narrow claims relating to fraud. For instance, under the Plan as approved, creditors will have to give up their

claims against the Dealers who sold them their ABCP Notes, including challenges to the way the Dealers characterized the ABCP and provided (or did not provide) information about the ABCP. The claims against the proposed defendants are mainly in tort: negligence, misrepresentation, negligent misrepresentation, failure to act prudently as a dealer/advisor, acting in conflict of interest, and in a few cases fraud or potential fraud. There are also allegations of breach of fiduciary duty and claims for other equitable relief.

[30] The application judge found that, in general, the claims for damages include the face value of the Notes, plus interest and additional penalties and damages.

[31] The releases, in effect, are part of a *quid pro quo*. Generally speaking, they are designed to compensate various participants in the market for the contributions they would make to the restructuring. Those contributions under the Plan include the requirements that:

- a) Asset Providers assume an increased risk in their credit default swap contracts, disclose certain proprietary information in relation to the assets, and provide below-cost financing for margin funding facilities that are designed to make the notes more secure;
- b) Sponsors – who in addition have cooperated with the Investors’ Committee throughout the process, including by sharing certain proprietary information – give up their existing contracts;

- c) The Canadian banks provide below-cost financing for the margin funding facility and,
- d) Other parties make other contributions under the Plan.

[32] According to Mr. Crawford's affidavit, the releases are part of the Plan "because certain key participants, whose participation is vital to the restructuring, have made comprehensive releases a condition for their participation."

The CCAA Proceedings to Date

[33] On March 17, 2008 the applicants sought and obtained an Initial Order under the CCAA staying any proceedings relating to the ABCP crisis and providing for a meeting of the Noteholders to vote on the proposed Plan. The meeting was held on April 25th. The vote was overwhelmingly in support of the Plan – 96% of the Noteholders voted in favour. At the instance of certain Noteholders, and as requested by the application judge (who has supervised the proceedings from the outset), the Monitor broke down the voting results according to those Noteholders who had worked on or with the Investors' Committee to develop the Plan and those Noteholders who had not. Re-calculated on this basis the results remained firmly in favour of the proposed Plan – 99% of those connected with the development of the Plan voted positively, as did 80% of those Noteholders who had not been involved in its formulation.

[34] The vote thus provided the Plan with the “double majority” approval – a majority of creditors representing two-thirds in value of the claims – required under s. 6 of the CCAA.

[35] Following the successful vote, the applicants sought court approval of the Plan under s. 6. Hearings were held on May 12 and 13. On May 16, the application judge issued a brief endorsement in which he concluded that he did not have sufficient facts to decide whether all the releases proposed in the Plan were authorized by the CCAA. While the application judge was prepared to approve the releases of negligence claims, he was not prepared at that point to sanction the release of fraud claims. Noting the urgency of the situation and the serious consequences that would result from the Plan’s failure, the application judge nevertheless directed the parties back to the bargaining table to try to work out a claims process for addressing legitimate claims of fraud.

[36] The result of this renegotiation was a “fraud carve-out” – an amendment to the Plan excluding certain fraud claims from the Plan’s releases. The carve-out did not encompass all possible claims of fraud, however. It was limited in three key respects. First, it applied only to claims against ABCP Dealers. Secondly, it applied only to cases involving an express fraudulent misrepresentation made with the intention to induce purchase and in circumstances where the person making the representation knew it to be false. Thirdly, the carve-out limited available damages to the value of the notes, minus any funds distributed as part of the Plan. The appellants argue vigorously that such a

limited release respecting fraud claims is unacceptable and should not have been sanctioned by the application judge.

[37] A second sanction hearing – this time involving the amended Plan (with the fraud carve-out) – was held on June 3, 2008. Two days later, Campbell J. released his reasons for decision, approving and sanctioning the Plan on the basis both that he had jurisdiction to sanction a Plan calling for third-party releases and that the Plan including the third-party releases in question here was fair and reasonable.

[38] The appellants attack both of these determinations.

C. LAW AND ANALYSIS

[39] There are two principal questions for determination on this appeal:

- 1) As a matter of law, may a CCAA plan contain a release of claims against anyone other than the debtor company or its directors?
- 2) If the answer to that question is yes, did the application judge err in the exercise of his discretion to sanction the Plan as fair and reasonable given the nature of the releases called for under it?

(1) Legal Authority for the Releases

[40] The standard of review on this first issue – whether, as a matter of law, a CCAA plan may contain third-party releases – is correctness.

[41] The appellants submit that a court has no jurisdiction or legal authority under the CCAA to sanction a plan that imposes an obligation on creditors to give releases to third parties other than the directors of the debtor company.¹ The requirement that objecting creditors release claims against third parties is illegal, they contend, because:

- a) on a proper interpretation, the CCAA does not permit such releases;
- b) the court is not entitled to “fill in the gaps” in the CCAA or rely upon its inherent jurisdiction to create such authority because to do so would be contrary to the principle that Parliament did not intend to interfere with private property rights or rights of action in the absence of clear statutory language to that effect;
- c) the releases constitute an unconstitutional confiscation of private property that is within the exclusive domain of the provinces under s. 92 of the *Constitution Act*, 1867;
- d) the releases are invalid under Quebec rules of public order; and because
- e) the prevailing jurisprudence supports these conclusions.

[42] I would not give effect to any of these submissions.

Interpretation, “Gap Filling” and Inherent Jurisdiction

[43] On a proper interpretation, in my view, the CCAA permits the inclusion of third party releases in a plan of compromise or arrangement to be sanctioned by the court where those releases are reasonably connected to the proposed restructuring. I am led to this conclusion by a combination of (a) the open-ended, flexible character of the CCAA itself, (b) the broad nature of the term “compromise or arrangement” as used in the Act, and (c) the express statutory effect of the “double-majority” vote and court sanction

¹ Section 5.1 of the CCAA specifically authorizes the granting of releases to directors in certain circumstances.

which render the plan binding on all creditors, including those unwilling to accept certain portions of it. The first of these signals a flexible approach to the application of the Act in new and evolving situations, an active judicial role in its application and interpretation, and a liberal approach to that interpretation. The second provides the entrée to negotiations between the parties affected in the restructuring and furnishes them with the ability to apply the broad scope of their ingenuity in fashioning the proposal. The latter afford necessary protection to unwilling creditors who may be deprived of certain of their civil and property rights as a result of the process.

[44] The CCAA is skeletal in nature. It does not contain a comprehensive code that lays out all that is permitted or barred. Judges must therefore play a role in fleshing out the details of the statutory scheme. The scope of the Act and the powers of the court under it are not limitless. It is beyond controversy, however, that the CCAA is remedial legislation to be liberally construed in accordance with the modern purposive approach to statutory interpretation. It is designed to be a flexible instrument and it is that very flexibility which gives the Act its efficacy: *Canadian Red Cross Society (Re)* (1998), 5 C.B.R. (4th) 299 (Ont. Gen. Div.). As Farley J. noted in *Re Dylex Ltd.* (1995), 31 C.B.R. (3d) 106 at 111 (Ont. Gen. Div.), “[t]he history of CCAA law has been an evolution of judicial interpretation.”

[45] Much has been said, however, about the “evolution of judicial interpretation” and there is some controversy over both the source and scope of that authority. Is the source

of the court's authority statutory, discerned solely through application of the principles of statutory interpretation, for example? Or does it rest in the court's ability to "fill in the gaps" in legislation? Or in the court's inherent jurisdiction?

[46] These issues have recently been canvassed by the Honourable Georgina R. Jackson and Dr. Janis Sarra in their publication "Selecting the Judicial Tool to get the Job Done: An Examination of Statutory Interpretation, Discretionary Power and Inherent Jurisdiction in Insolvency Matters,"² and there was considerable argument on these issues before the application judge and before us. While I generally agree with the authors' suggestion that the courts should adopt a hierarchical approach in their resort to these interpretive tools – statutory interpretation, gap-filling, discretion and inherent jurisdiction – it is not necessary in my view to go beyond the general principles of statutory interpretation to resolve the issues on this appeal. Because I am satisfied that it is implicit in the language of the CCAA itself that the court has authority to sanction plans incorporating third-party releases that are reasonably related to the proposed restructuring, there is no "gap-filling" to be done and no need to fall back on inherent jurisdiction. In this respect, I take a somewhat different approach than the application judge did.

² Justice Georgina R. Jackson and Dr. Janis P. Sarra, "Selecting the Judicial Tool to get the Job Done: An Examination of Statutory Interpretation, Discretionary Power and Inherent Jurisdiction in Insolvency Matters" in Sarra, ed., *Annual Review of Insolvency Law, 2007* (Vancouver: Thomson Carswell, 2007).

[47] The Supreme Court of Canada has affirmed generally – and in the insolvency context particularly – that remedial statutes are to be interpreted liberally and in accordance with Professor Driedger’s modern principle of statutory interpretation. Driedger advocated that “the words of an Act are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament”: *Re Rizzo & Rizzo Shoes Ltd.*, [1998] 1 S.C.R. 27 at para. 21, quoting E.A. Driedger, *Construction of Statutes*, 2nd ed. (Toronto: Butterworths, 1983); *Bell Expressvu Ltd. Partnership v. R.*, [2002] 2 S.C.R. 559 at para. 26.

[48] More broadly, I believe that the proper approach to the judicial interpretation and application of statutes – particularly those like the CCAA that are skeletal in nature – is succinctly and accurately summarized by Jackson and Sarra in their recent article, *supra*, at p. 56:

The exercise of a statutory authority requires the statute to be construed. The plain meaning or textualist approach has given way to a search for the object and goals of the statute and the intentionalist approach. This latter approach makes use of the purposive approach and the mischief rule, including its codification under interpretation statutes that every enactment is deemed remedial, and is to be given such fair, large and liberal construction and interpretation as best ensures the attainment of its objects. This latter approach advocates reading the statute as a whole and being mindful of Driedger’s “one principle”, that the words of the Act are to be read in their entire context, in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament. It is important that

courts first interpret the statute before them and exercise their authority pursuant to the statute, before reaching for other tools in the judicial toolbox. Statutory interpretation using the principles articulated above leaves room for gap-filling in the common law provinces and a consideration of purpose in *Québec* as a manifestation of the judge's overall task of statutory interpretation. Finally, the jurisprudence in relation to statutory interpretation demonstrates the fluidity inherent in the judge's task in seeking the objects of the statute and the intention of the legislature.

[49] I adopt these principles.

[50] The remedial purpose of the CCAA – as its title affirms – is to facilitate compromises or arrangements between an insolvent debtor company and its creditors. In *Chef Ready Foods Ltd. v. Hongkong Bank of Canada* (1990), 4 C.B.R. (3d) 311 at 318 (B.C.C.A.), Gibbs J.A. summarized very concisely the purpose, object and scheme of the Act :

Almost inevitably, liquidation destroyed the shareholders' investment, yielded little by way of recovery to the creditors, and exacerbated the social evil of devastating levels of unemployment. The government of the day sought, through the C.C.A.A., to create a regime whereby the principals of the company and the creditors could be brought together under the supervision of the court to attempt a reorganization or compromise or arrangement under which the company could continue in business.

[51] The CCAA was enacted in 1933 and was necessary – as the then Secretary of State noted in introducing the Bill on First Reading—“because of the prevailing commercial and industrial depression” and the need to alleviate the effects of business bankruptcies in that context: see the statement of the Hon. C.H. Cahan, Secretary of

State, *House of Commons Debates (Hansard)* (April 20, 1933) at 4091. One of the greatest effects of that Depression was what Gibbs J.A. described as “the social evil of devastating levels of unemployment”. Since then, courts have recognized that the Act has a broader dimension than simply the direct relations between the debtor company and its creditors and that this broader public dimension must be weighed in the balance together with the interests of those most directly affected: see, for example, *Elan Corp. v. Comiskey (Trustee of)* (1990), 1 O.R. (3d) 289 (C.A.), *per* Doherty J.A. in dissent; *Re Skydome Corp.* (1998), 16 C.B.R. (4th) 125 (Ont. Gen. Div.); *Re Anvil Range Mining Corp.* (1998), 7 C.B.R. (4th) 51 (Ont. Gen. Div.).

[52] In this respect, I agree with the following statement of Doherty J.A. in *Elan, supra*, at pp. 306-307:

. . . [T]he Act was designed to serve a “broad constituency of investors, creditors and employees”.³ Because of that “broad constituency” the court must, when considering applications brought under the Act, *have regard not only to the individuals and organizations directly affected by the application, but also to the wider public interest.* [Emphasis added.]

Application of the Principles of Interpretation

[53] An interpretation of the CCAA that recognizes its broader socio-economic purposes and objects is apt in this case. As the application judge pointed out, the restructuring underpins the financial viability of the Canadian ABCP market itself.

³ Citing Gibbs J.A. in *Chef Ready Foods, supra*, at pp.319-320.

[54] The appellants argue that the application judge erred in taking this approach and in treating the Plan and the proceedings as an attempt to restructure a financial market (the ABCP market) rather than simply the affairs between the debtor corporations who caused the ABCP Notes to be issued and their creditors. The Act is designed, they say, only to effect reorganizations between a corporate debtor and its creditors and not to attempt to restructure entire marketplaces.

[55] This perspective is flawed in at least two respects, however, in my opinion. First, it reflects a view of the purpose and objects of the CCAA that is too narrow. Secondly, it overlooks the reality of the ABCP marketplace and the context of the restructuring in question here. It may be true that, in their capacity as *ABCP Dealers*, the releasee financial institutions are “third-parties” to the restructuring in the sense that they are not creditors of the debtor corporations. However, in their capacities as *Asset Providers* and *Liquidity Providers*, they are not only creditors but they are prior secured creditors to the Noteholders. Furthermore – as the application judge found – in these latter capacities they are making significant contributions to the restructuring by “foregoing immediate rights to assets and ... providing real and tangible input for the preservation and enhancement of the Notes” (para. 76). In this context, therefore, the application judge’s remark at para. 50 that the restructuring “involves the commitment and participation of all parties” in the ABCP market makes sense, as do his earlier comments at paras. 48-49:

Given the nature of the ABCP market and all of its participants, it is more appropriate to consider all Noteholders

as claimants and the object of the Plan to restore liquidity to the assets being the Notes themselves. The restoration of the liquidity of the market necessitates the participation (including more tangible contribution by many) of all Noteholders.

In these circumstances, it is unduly technical to classify the Issuer Trustees as debtors and the claims of the Noteholders as between themselves and others as being those of third party creditors, although I recognize that the restructuring structure of the CCAA requires the corporations as the vehicles for restructuring. [Emphasis added.]

[56] The application judge did observe that “[t]he insolvency is of the ABCP market itself, the restructuring is that of the market for such paper ...” (para. 50). He did so, however, to point out the uniqueness of the Plan before him and its industry-wide significance and not to suggest that he need have no regard to the provisions of the CCAA permitting a restructuring as between debtor and creditors. His focus was on *the effect* of the restructuring, a perfectly permissible perspective, given the broad purpose and objects of the Act. This is apparent from his later references. For example, in balancing the arguments against approving releases that might include aspects of fraud, he responded that “what is at issue is a liquidity crisis that affects the ABCP market in Canada” (para. 125). In addition, in his reasoning on the fair-and-reasonable issue, he stated at para. 142: “Apart from the Plan itself, there is a need to restore confidence in the financial system in Canada and this Plan is a legitimate use of the CCAA to accomplish that goal.”
